OPEN to all — FREE to attend

**BC Virtual — BORDERLESS CYBER**

## MITIGATING GLOBAL SUPPLY CHAIN THREATS WITH INTEROPERABILITY

23-24 June — Conference Program
22 June — Plug Fest & Workshops

SPECIAL GUEST SPEAKERS

Allan Friedman
Director Cybersecurity Initiatives
U.S. Department of Commerce, NTIA

Cassie Crossley
Director Product & Systems Security
Schneider Electric

Joshua Corman
Senior Advisor and Visiting Researcher
U.S. DHS CISA

OASIS Open and The National Council of ISACs team up to bring you a two-day virtual cybersecurity program focused on interoperability strategies to help mitigate threats to one of our most critical global areas — Supply Chains.

The event will include a diverse hand-picked group of global cybersecurity experts that will share their views on the right combination of measures needed to ensure your cybersecurity strategy confidence reaches that next level.

WHO SHOULD ATTEND?

C-suite executives, threat intel and cyber security managers, and technical representatives from various disciplines, such as security teams, commercial security vendors, open-source security developers, CSIRTs, researchers and maintainers of open security standards.

Through a mixture of interactive panel discussions and presentations, you'll hear how you can be part of the global collaboration effort and learn actionable advice needed to avoid being the next target.

The Program features speakers from Maritime Transportation System ISAC, Schneider Electric, U.S. Department of Commerce, DHS ICT Supply Chain Task Force, CISA, Election Systems & Software, New York Presbyterian Hospital, Microsoft, Aviation Information Sharing and Analysis Center, CMMC Center of Excellence, and other organizations.
