RANSOM TROJANS
ALL YOUR PERSONAL FILES WERE ENCRYPTED WITH A STRONG ALGORYTHM RSA-1024 AND YOU CAN'T GET AN ACCESS TO THEM WITHOUT MAKING OF WHAT WE NEED!

READ 'HOW TO DECRYPT' TXT-FILE ON YOUR DESKTOP FOR DETAILS

JUST DO IT AS FAST AS YOU CAN!

REMEMBER: DON'T TRY TO TELL SOMEONE ABOUT THIS MESSAGE IF YOU WANT TO GET YOUR FILES BACK! JUST DO ALL WE TOLD.
Attention!!!

All your personal files (photo, documents, texts, databases, certificates, video) have been encrypted by a very strong cypher RSA-1024.

The original files were deleted. You can check - just look for files in all folders.

There is no possibility to decrypt these files without a special decrypt program! Nobody can help you - even don't try to find another method or tell anybody. Also after n days all encrypted files will be completely deleted and you will have no chance to get it back.

We can help to solve this task for 125$ via ukash/psc pre-paid cards. And remember: any harmful or bad words to our side will be a reason for ingoring your message and nothing will be done.

For details you have to send your request on this e-mail (attach to message a full serial key shown below in this 'how to..' file on desktop): filemaker@safe-mail.net

How to use Asrar al-Mujahideen
Sending an important message in the old days only required a piece of paper, a writing utensil, and a trustworthy messenger that knows the location of the party you need to reach. Today, this is still an effective method if such a messenger is available and can get around without anyone stopping him. However, for the most part, this method has slowly evaporated and is now replaced with the Internet. Its benefit is that if there is no messenger that exists, access to the other party is only a few clicks of a mouse button away. Its harm is that the spies are actively paying attention to the Emails, especially if you are an individual that is known to be jihâdi-minded. So how does one go about sending important messages without it being noticed by the enemy? Following is one method and that is by using an encryption software.

One such software is a program created by our brothers called Asrar al-Mujahideen 2.0. Here, we will discuss how to use this program, how to create your key, how to send and receive the public key of the other party, and how to check if your version of the software is forfeited or not. There are many things you can do with this program besides sending and receiving encrypted messages; we will cover those aspects in later issue, In Shâ’

In the first field, you type in your username that you would like to use; it has to be at least 5 characters. If you would like to use Arabic, you just have to click on the button to the far right to change the language. Then for the passphrase, enter in a password that is easy for you to remember, but difficult for anyone to figure out; it has to be at least 8
4) التشغيل والتجربة

نعود ونكرّر أن هذه العملية ليست للمبتدئين، وأن التشغيل في بعض الحالات قد يؤدي إلى مشاكل لا تحمد عقبها.

بعد إعداد ملف الخيارات كما هو ووضوح في القسم السابق تكون جاهز لرحلة التشغيل.

(a) تشغيل ملف

يتم باستخدام الأمر التالي:

hxdef100.exe [inifile]

و [inifile] هو اسم ملف الإعدادات، وهنا في النص الرقيق:

hxdef100.ini

نتاج ما بعد التشغيل:

في هذه الصورة تظهر الملفات قبل الإلغاء:
