

Lightning Talks – FIRST Conference 2011

Jacomo Piccolini

Director of Outreach

<http://www.dragonresearchgroup.org/>

**Dragon Research Group** is a volunteer research organization dedicated to further understanding of online criminality and to provide actionable intelligence for the benefit of the entire Internet community.

We are currently looking for volunteers, please check open positions and requirements at:

<http://www.dragonresearchgroup.org/2011/06/02/#volunteers-201106>

<http://www.dragonresearchgroup.org/apply.html>

## Join the **DRG** DISTRO Network – IPv6 and IPv4 PODs needed

The DRG Distro Network is a global monitoring network that contains UNIX hosts running application listeners for a few key well known services such as DNS, HTTP and SSH on otherwise unused address space. About one third of the DRG Distro Network has globally routed IPv6 addresses in almost ten different countries.

We are looking for hosting partners to expand our network.

More information available at:

<http://www.dragonresearchgroup.org/drg-distro.html>

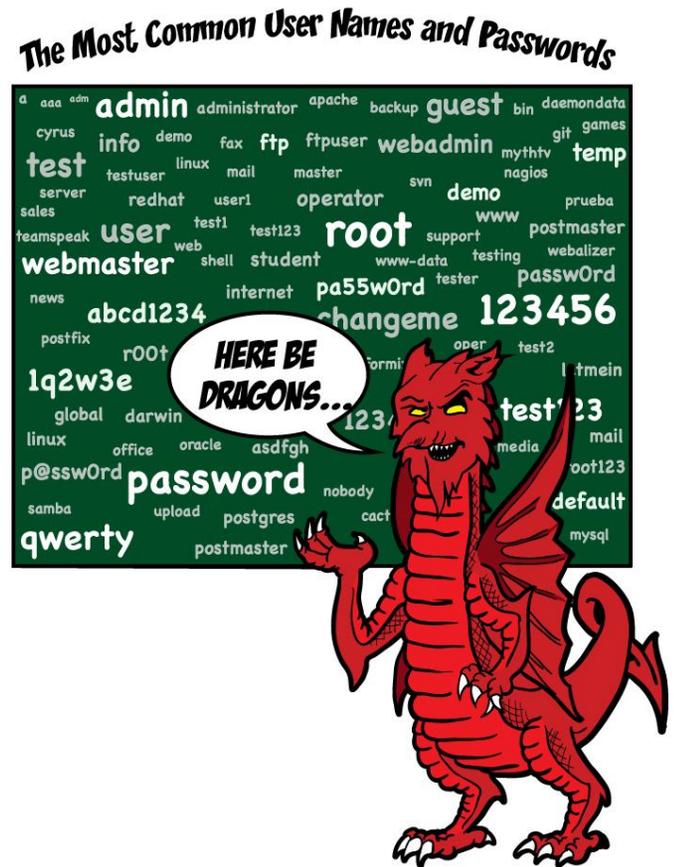

We are proud of our volunteers, POD runners and partners!

Please come and get your **DRG** t-shirt

Unique t-shirt with real data collected from our network!

Thank you for helping!
