

CERT.be
The Federal Cyber Emergency Team

Leaving our island: a communication and business strategy for a National CSIRT

Christian Van Heurck
Coordinator

24th annual FIRST conference - Malta - 17-22 June 2012

Agenda

- Core idea
- Case Introduction
- Techniques & Results
- Case results
- Lessons learned
- Q&A

Core idea

EXPERTISE
is essential
for any
CSIRT service

Core idea

COMMUNICATION
is an
essential service
of any
CSIRT

Case introduction

CERT.be

The federal cyber emergency team

a service of Fedict
operated by Belnet

CERT.be history

- **Belnet CERT in 2004**
- **Grew to 3 FTE (+ Belnet)**
- **CERT.be created in 09 / 2009**
- **Grown to 8 FTE (+ Belnet)**

CERT.be initial assets

- **Part of CSIRT community**
- Contacts with National partners (LE, CERT MIL)
- **Neutrality & Confidentiality**
- **Trusted** by those who knew us
- **Key role in Belgian Internet landscape**
- **Experience in incident handling**
- **Specialists**
- **Motivated team**

CERT.be initial weaknesses

- **Not known by all those needed**
- **NREN CSIRT model did not scale**
- Too much focus on technical expertise
- No real communication strategy
- **Expectations & Ambition**
- **Team & budget size**
- **No solid contract nor mandate**
- Political situation

Techniques and results

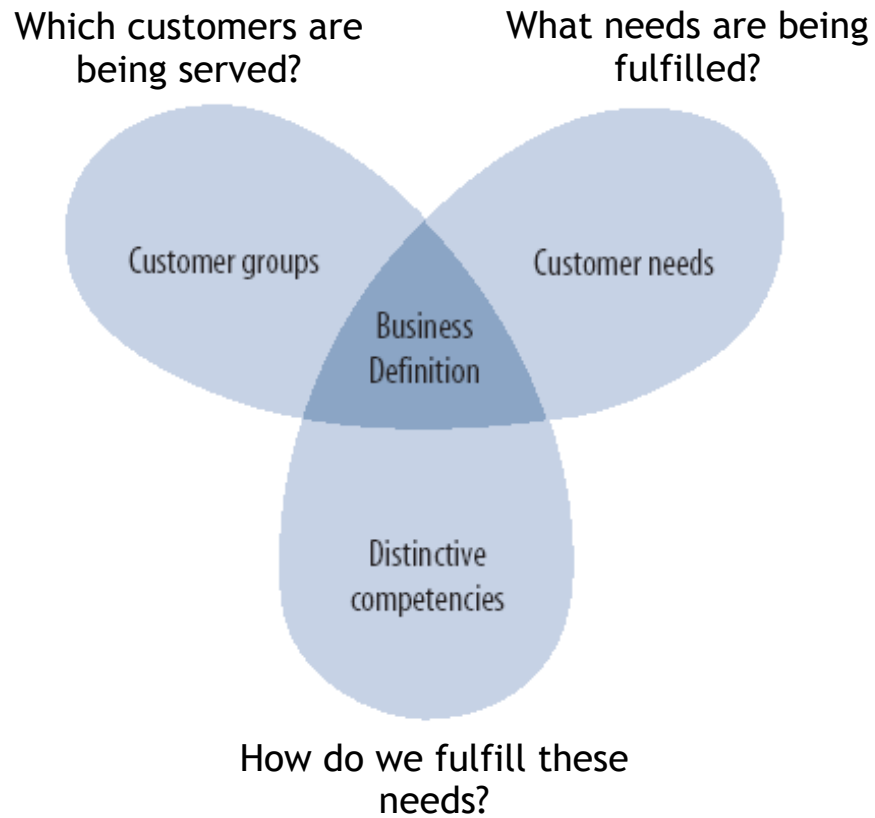

- CFT to help with **communication plan**
- Start in 09/2011 with **expert** in:
 - start & growth strategy for business
 - marketing ROI
 - corporate positioning
 - product & service positioning
 - ...
- He knew **nothing** about a CSIRT
- He **loved** this case!

Some interesting results

- **CERT.be communication situated on different levels**
- **3 external levels**
 - Brand or corporate = mission, vision
 - Market = segmented with different goals
 - Service = positioning & describing services
- **2 internal levels**
 - Amongst CSIRT community
 - Within Belnet and Fedict
- **Communication is an essential CERT.be service**

Some interesting results

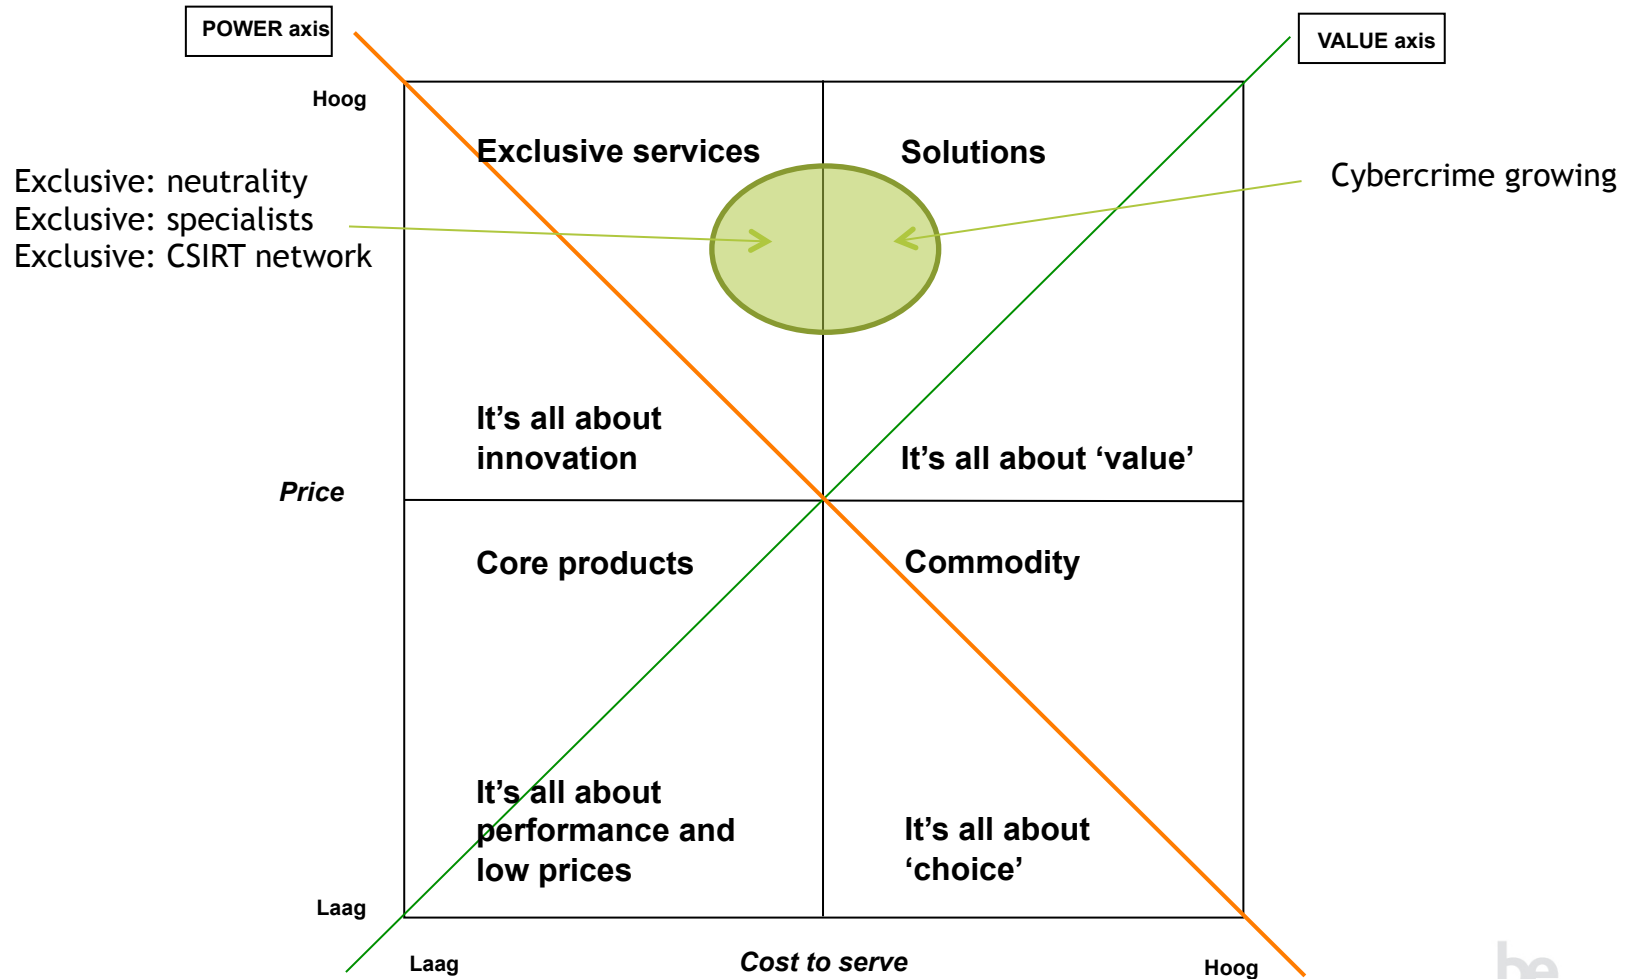

- **CERT.be business definition model**

Some interesting results

- **Value disciplines model (Treacy and Wiersema)**
 - Operational excellence
 - efficiency, monitoring & measuring, static portfolio
 - Product leadership
 - R&D, flexible, innovative
 - Customer intimacy
 - large portfolio, structure close to customer, long term
- **Excel in one - threshold for other 2**
 - Product leaders
 - Price leaders
 - Customer leaders

Some interesting results

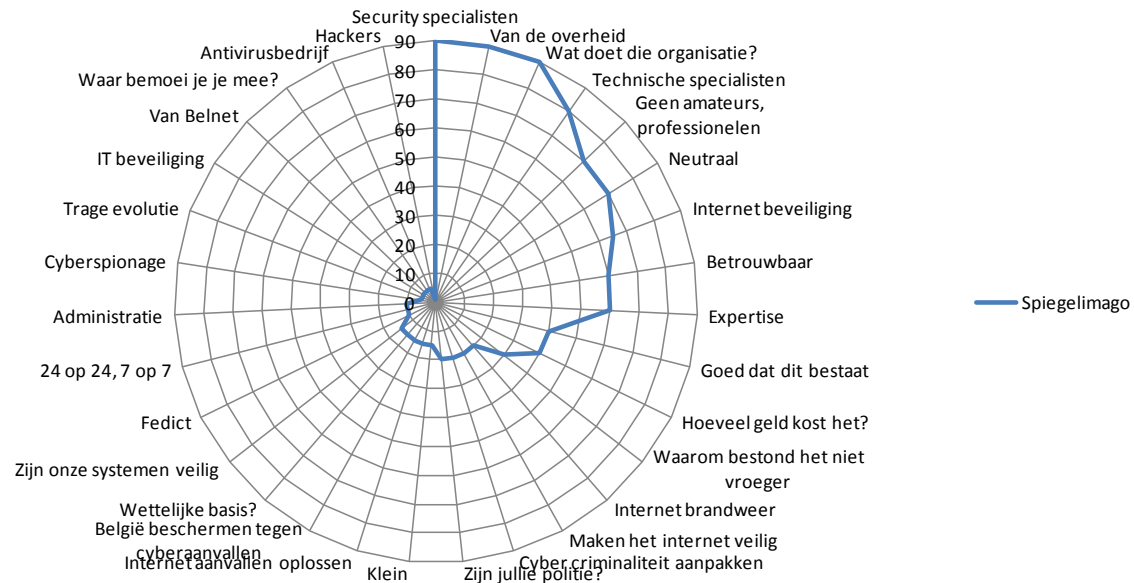

Some interesting results

- **Brand equity profiles for different segments**
 - Actual
 - Wanted
- **SWOT & confrontation matrix**
- **Corporate ideology, mission and vision**
- **KPIs for the service brand CERT.be**
 - Reliability
 - Responsiveness
 - Tangibles

The list goes on ...

- Brand positioning
- Image model
 - Image - Mirror image - Wanted - Ideal - Image matrix

And on ...

- **Value proposition**
- **Product positioning matrix**
- **12-cell matrix: define essential criteria**
 - Take action
 - Use opportunity
 - Pay less attention
 - Marginalize attention
- **Positioning**
- **Brand structures**
- **Endorsed brand structure for CERT.be**
- **Communication planning**
 - Tactical planning

Results produced

- **Communication plan for CERT.be**
 - Finished in 10/2012
 - 20 page report
 - 69 page presentation
 - Spreadsheets with planning
 - Presentation to stakeholders
 - Spreadsheet with planning
 - Business positioning
 - Positioning tagline
 - Business definition model
 - Corporate ideology
 - Brand strategy

Results produced

- **Communication strategy for CERT.be**
 - Strategic goals
 - Communication goals
 - Target groups
 - Communication goals by target group
 - Operational communication
 - Planning
 - Means
 - Evaluation parameters

Case results: opportunity

- **DNS-changer malware**
 - Applied what we learned
 - Positive results!

The screenshot shows a notification from CERT.be, The Federal Cyber Emergency Team. It features a green checkmark icon and a green box with the text: "Uw systeem lijkt niet besmet met het virus **DNSChanger**" and "Votre système ne semble pas infecté par le virus **DNSChanger**". Below this, there is a paragraph in Dutch and French, followed by links for more information and an update regarding the test period extension to July 9, 2012.

CERT.be The Federal Cyber Emergency Team

Uw systeem lijkt niet besmet met het virus **DNSChanger**
Votre système ne semble pas infecté par le virus **DNSChanger**

Uw computer is nu getest op het virus "DNSChanger" en u moet geen verdere actie ondernemen. Kunt u na 9 juli 2012 toch niet meer op internet, contacteer dan uw internetleverancier.
[Meer informatie over het virus "DNSChanger"](#)
Update: Testperiode verlengd tot 9 juli 2012

Votre ordinateur a désormais été testé pour le virus "DNSChanger" et vous ne devez plus rien faire. Si, à partir du 9 juillet 2012, vous ne pouvez plus accéder à internet depuis votre ordinateur, contactez votre fournisseur internet.
[Plus d'informations sur le virus "DNSChanger"](#)
Mise-à-jour: Période de test prolongée jusqu'au 9 juillet 2012

Case results: CERT.be initial weaknesses

- **Not known by all those needed**
- **NREN CSIRT model did not scale**
- Too much focus on technical expertise
- No real communication strategy
- **Expectations & Ambition**
- **Team & budget size**
- **No solid contract nor mandate**
- Political situation

Case results: media barometer

Barometer + van february 2012

BELNET

CERT.BE (26364)

Evolutie vergeleken met vorige maand

14446,77%

Minimum aantal personen die door de info werden bereikt

N/A

Aantal dagbladartikels

Aantal franstalige artikels

Lessons learned

- **IT WORKS!**
 - Engaging communication profile
 - Impact on workload
 - Impact on project planning
 - Change “state of mind”
 - No silver bullet
 - Journalists are important
 - Media training
 - Symbiosis
 - Have to follow the news
 - More efficient in the end

Conclusion

COMMUNICATION
is an
essential service
of any
CSIRT
